

Helping to Ensure the Safety of your On-site Workforce

The UK Government has recently issued a directive for construction firms to re-open, if they haven't already. Whether continuing to work, or re-opening sites, additional Health & Safety procedures must be put in place to protect your workforce.

With all sites required to carry out a Risk Assessment and then initiate responsible measures to ensure workers are protected, [AssetTagz](#) helps manage your re-opening efforts and compliance with the Construction Leadership Council's new Site Operating Procedures (SOP).

AssetTagz functionality allows for efficient tracking and management of new Health & Safety processes and procedures initiated due to COVID-19

COVID-19 SITE SAFETY

- H&S officers are able to complete a customised site safety checklist at each jobsite, ensuring compliance with corporate directives.
- With cleansing and sanitising of equipment a top priority, AssetTagz is able to implement procedures directing users to perform the necessary tasks before issuing and after use of plant, tools and other equipment.
- The change of equipment operator could also prompt new sanitising procedures to be undertaken, via customised checklists appropriate for the type of equipment.

Ensure your SOP are updated and you have a complete audit trail to ensure your compliance with the new COVID-19 directives.

Keep your workforce safe and don't leave yourself open for HSE enforcement action.

TRAINING – COVID-19 PROCEDURES

Training Details

Course Name **Daily Task Briefing**
Course Code **DTB**
Location **Leicester**
Qualification **None**
Start Date **06/05/20**
Start Time **9:37 AM**
Description **Disposal of spent PPE**

CANCEL NEXT >

- With each owner/site responsible for enacting their new procedures, a trained workforce provides for a safer site. AssetTagz is able to record each training session, including the content of the training, with each worker enrolling by having their ID card scanned and confirming their competence at the end of the session.
- From building awareness of handwashing locations to the appropriate task-based distancing, AssetTagz is able to create training records for any new procedure.

ISSUING OF PPE – PROTECTING YOUR WORKFORCE

Issue Selection

s01588

Quantity of FULL FACE MASK (S01588): ENTER

4 Items

ALCOHOL SANITISING WIPES (S01543)	3
HI-VISIBILITY JACKET (S01501)	1
PROTECTIVE GLASSES (S01502)	1
PROTECTIVE GLOVES (S01503)	1

- AssetTagz can easily track the issuing of appropriate PPE to each worker – tracked by date, item and quantity issued. Alerts can be automated to advise changing or replacing pertinent PPE, such as RPE.
- Touchless acceptance is confirmed with a scan of the workers' ID badge. New workers can easily be added before being issued with PPE, plant and equipment.
- AssetTagz can also prompt the issuer if certain devices should be issued to only one person/operator, for example, radios, mobiles or certain tools.

Lead the Fight on COVID-19 Health and Safety while operating efficiently and protecting your workforce

From the issuing of PPE to Site Safety checklists, [AssetTagz](#) can help facilitate an efficient and compliant return to work for the construction industry.

Seamless integration into client's ERP, accounting & hire systems, **or as stand-alone application**. AssetTagz App can be loaded and run from a smart phone – Android and iOS, with minimal IT resources required to use AssetTagz quickly and effectively.

AssetTagz is a smart, proven and effective asset management solution using a clever app installed on a smartphone, tablet or rugged mobile device. Assets are identified through the use of RFID tags (NFC or UHF) or barcodes, all managed through a secure cloud database.
